

REPORT

OF THE

AUCKLAND INSTITUTE

AND

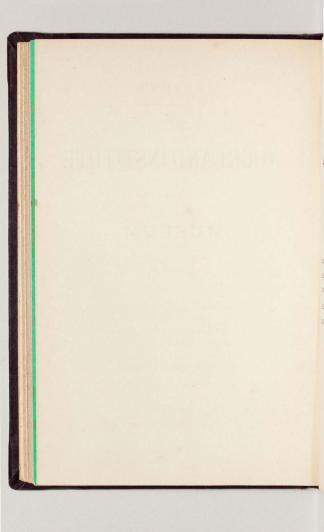

MUSEUM.

For 1881-82.

ADOPTED AT THE ANNUAL MEETING HELD FEB. 20TH, 1882.

AUCKLAND:
PRINTED BY H. BRETT, AT THE "STAR" OFFICE, WYNDHAM ST.
1882.

OFFICERS

OF THE

AUGKLAND INSTITUTE

Council:

PRESIDENT-E, A. MACKECHNIE, Esq.

AICKIN, G., Esq. CLARK, J. M., Esq. COWIE, RIGHT REV. W. G., D.D. PEACOCK, T., Esq., M.H.R. GILLIES, HIS HONOR JUSTICE.

HAULTAIN, HON. COLONEL.

| HEATH, NEIL, Esq. MARTIN, J., Esq., F.G.S. POND, J. A., Esq. PURCHAS, REV. A. G., M. R. C. S. E.

SMITH, S. PERCY, Esq., F.R.G.S.

Secretary and Treasurer:

T. F. CHEESEMAN, Esq., F.L.S.

Auditor:

T. MACFFARLANE, Esq.

THE FOLLOWING MAGAZINES AND PERIODICALS ARE CIRCULATED AMONGST THE MEMBERS;

Quarterly Journal of Microscopical Science

Journal of Science

Popular Science Review

Nature

Geological Magazine

Lancet

Scientific American

The Academy

Botanical Magazine

Gardener's Chronicle

Chemical News

Engineering

Science Gossip

Electrical and Telegraphic Review

Journal of the Society of Arts

Annals and Magazine of Natural History

Winter Session, 1882.

MEETINGS WILL BE HELD ON THE FOLLOWING MONDAY EVENINGS:

MAY 29 JUNE 26 AUGUST 28 SEPTEMBER 25

JULY 31

OCTOBER 23

TO COMMENCE AT 7.30 P.M.

Extracts from the Rules.

I.—Any person desiring to become a Member of the Institute shall be proposed in writing by two Members, and shall be ballotted for at the next meeting of the Council.

2.—New Members on election to pay One Pound One Shilling Entrance Fee, in addition to the usual Subscription of One Pound One Shilling, the Annual Subscription being payable in advance on the first day of April for the then current year.

3:—Members may at any time become Life Members by one payment of Ten Pounds ten shillings, in lieu of future Annual Subscriptions.

THE Council have the pleasure of submitting to the Members the ordinary Annual Report on the financial and general condition of the Society.

Members.—The number of Members elected during the past year has been 48. In the previous year the number of elections was 30. On the other hand, 23 names have been withdrawn from the roll; 3 from death, 7 by resignation, and 13 by default of subscription. The net increase is thus 25; the total number on the roll at the present time being 302.

Finances.—The total revenue for the year (as shewn by the annexed balance-sheet) has been \mathcal{L}_{513} a.5 d. Of this sum \mathcal{L}_{332} 17s. has been contributed by the members' subscriptions. Last year the amount under this head was \mathcal{L}_{288} 6s. The expenditure reaches the sum of \mathcal{L}_{503} os. 4d., leaving a credit balance of \mathcal{L}_{10} 1s. 1d. There are, however, outstanding accounts to the amount of over \mathcal{L}_{40} remaining to be liquidated, so that the year's operations will eventually shew a small deficit.

MEETINGS.—The monthly meetings for the reading of papers have been held as usual, and were fairly attended. The following is the list of the papers read:--

- 1. Inaugural Address: by the PRESIDENT.
- On the Occurrence of the Golden Plover (Charadrius fulvus) in New Zealand: by T. F. Cheeseman, F.L.S.
- On some new species of Carabidæ: by Capt. T. Broun M.E.S.
- Notes on the New Zealand Mollusca: by Mr. Justice Gillies.
- 5. On Crystalline Rocks: by W. D. CAMPBELL, F.G.S.
- 6. On some additions to the Flora of New Zealand: by T. F. Cheeseman, F.L.S.
- On some new species of Coleoptera: by Capt. T. Broun, M.E.S.
- Notes on Sorghum cultivation in New Zealand: by Mr. JUSTICE GILLIES.
- 9. The Shadow of Justice: by E. A. Mackechnie.

- 10. The New Zealand Dascyllidæ: by CAPT. T. BROUN, M.E.S.
- 11. On a Pseudomorphous form of Gold: by W. D. CAMPBELL, F.G.S.
- 12. On Epacris microphylla in New Zealand: by A. T. URQU-
- 13. Description of two species of Nudibranchiate Mollusca: by T. F. Cheeseman, F.L.S.
- 14. New Species of Curculionida: by CAPT. T. BROUN, M.E.S.
- 15. On the Sugar Values of Beets grown in the Waikato District: by J. A. Pond.
- On Evolution considered from its Religious side: by the REV. S. EDGAR.
- 17. On the Swiss Lake Dwellings: by NEIL HEATH.
- On the Flora of the Nelson Provincial District: by T. F. CHEESEMAN, F.L.S.
- 19. Recent Advances in Photography, with experimental illustrations: by J. Martin, F.G.S.
- Revision of the New Zealand Cossonidæ: by Captain T. Broun, M.E.S.
- Notice of the Occurrence of the Australian Roller (Eury stomus pacificus) in the Auckland District: by T. F. CHEESEMAN, F.L.S.
- CHEESEMAN, F.L.S.

 22. New Species of *Cerambycidæ*: by CAPT. T. BROUN, M.E.S.
- 23. Notes on various subjects: by J. Baber, C.E.
- On the percentage of Citric Acid obtained from Limes grown in Auckland and Tahiti: by J. A. Pond.
 - Translation of the Maori Tradition of Maui: by JUDGE MANING.
 - 26. On the Shore of the Unknown: by E. A. MACKECHNIF.

Most of the above will appear in the 14th volume of the "Transactions"—now in the press.

Museum.—The number of visitors to the Museum continues to increase in a steady ratio, but as the great majority of those who enter do not sign the visitors' book, it is impossible to give any accurate statistics on this point. The number of additions received during the past year has been large, as will be seen from the list appended to the Report. Those of special interest will be briefly alluded to here.

VERTEBRATA.—The most important addition in this class is an extensive series of birds and mammals, European and exotic, received in exchange from the Imperial Museum of Natural History at Florence, and including altogether 392 skins. Most of these have

been specially selected to fill up blanks in the type collection of Vertebrates that is gradually being formed for the Museum, as funds will allow. An interesting exchange has also arrived from Dr. Garnier, of Ontario, Canada, comprising specimens of North American birds and regitles, together with a few mammals. Mention should also be made of a nice collection of Humming Birds, kindly presented by the well-known ornithologist, Dr. Finsch. Thanks are also due to Mr. E. A. Plumley for some valuable New Zealand birdskins. The Council regret that they have only been able to retain the services of a taxidermist for a portion of the year, his work being confined to remounting and adding fresh specimens to the collection of New Zealand birds.

INVERTEBRATA.—A considerable number of small additions has been received, but nothing calling for special mention.

GEOLOGY AND PALEONYOLOGY.—Advantage was taken of the recent visit to Auckland of Professor H. A. Ward, of Rochester, to obtain for the Museum a set of the more valuable of his instructive casts of fossils. The casts have lately arrived from New York, and the greater portion have just been placed in the Museum.

ETHNOLOGY.—The only addition of importance in this department is a valuable collection of specimens from the Swiss Lake dwellings, kindly presented by Mr. J. T. Mackelvie, of London, who has been such a constant and liberal contributor to the Museum for many years

ART DEPARTMENT.—The Free School of Art established by Dr. Campbell has been regularly kept up, and, as in past years, at his sole expense. The Council trust that his continued and ever ready liberality may be the means of establishing a real and solid knowledge of Art in Auckland. In this place the Council have great and sincere pleasure in drawing the attention of the members to the two magnificent paintings—now within the Museum—presented to the citizens of Auckland by Mr. J. T. Mackelvie. The first is Maclise's grand picture "The Spirit of Justice," being the original design for his fresco of that name in the House of Lords. The other is by Baron Tiesenhansen, an eminent German artist. That two pictures of such undoubted excellence have been permanently secured for Auckland is indeed a most fortunate circumstance, and it is difficult to estimate the advantages to art students and others that will result from Mr. Mackelvie's generous and thoughtful action. It should be mentioned that Mr. Mackelvie reserves to himself the right of removing the pictures from their present home if at some future time a building more especially devoted to Art and Antiquities should be erected in Auckland.

CHECKS TO THE PROGRESS OF THE MUSEUM.—The present time seems to be favourable for pointing out the many serious and growing

disadvantages under which the Museum is placed in consequence of the want of any regular income beyond the small amount that can be spared from the slender funds of the Institute. Great inconvenience is experienced from the absence of suitable cases and other fittings, not only for the exhibition of the collections to the public, but for the safe storage of specimens received in exchange and waiting the taxidermist's manipulations, etc. Accommodation is also required for the packing, sorting, and temporary storage of specimens collected here for exchange with other Museums. A large proportion of the collections is yet exhibited in cases formerly in the old Museum, most of which are quite unsuited for the purpose, and occupy a considerable amount of space while showing very few articles. With the exception of the new cases erected during the last two or three years, and for which the Museum is indebted to the kindness of a few gentlemen, the whole of the fittings require alteration or renovation, and until this is done it is hopeless to think of a proper arrangement of the collections. Another serious matter is the slow growth of the New Zealand portion of the collections. In the Natural History department of any Museum the primary object should be to obtain, and to exhibit to the public in as full a manner as possible, a complete series of the natural production of the country or district in which it is situated. But with the exception of the Birds and Shells, small progress has been made in this direction here. To mention the Fishes, where it is highly important that there should be a good named collection, especially of the edible species, the cost of stuffing the larger varieties, and the expense of the glass jars and spirits required for the exhibition of the smaller ones, has effectually prevented any advance from being made. Hardly anything has been done towards forming a collection of New Zealand Insects, and this is altogether due to the want of cabinets for their reception, for several collectors would gladly assist if a reasonable prospect existed of their specimens being placed in safety. Again, the cost of glass jars and other requisites has prevented any attention to the whole of the marine invertebrata, with the exception of the shells, while the collection of New Zealand rocks and minerals, which should be one of the most important in the Museum, can only be partially exhibited at present, and is hardly being added to at all.

ENDOWMENT.—A suitable endowment for the Museum is the obvious remedy for the disadvantages described above, and the Council have urgently pressed this upon the notice of Government. Early in the year the Hon. the Minister of Lands was addressed on the question, and engaged to bring it under the notice of his colleagues. Prior to the session of Parliament, a circular was forwarded to the Auckland members explaining the position of the Museum, and asking for their active assistance. Unfortunately the members differed as to the proper mode of bringing the matter

under the notice of Parliament, and much valuable time was lost. Ultimately the Government admitted the justice of the claim, and introduced a Bill to provide for a landed endowment of the capital value of £10,000. It is with great regret that the Council have to state that, owing to the late period at which the Bill was brought forward, it was found impossible to pass it through the House in time, and it consequently lapsed. The Council trust that better success may attend their endeavours during the next session of Parliament.

LIBRARY.—During the year a catalogue of the Library has been compiled and printed, and is now ready for distribution to the members. The usual grant under the Public Libraries Subsidies Act not having been voted by Parliament, the Council have been unable to make any addition of importance to the Library themselves. They have, however, to express their indebtedness to Mr. J. T. Mackelvie for a most welcome and appropriate donation of 104 volumes relating to the early history of the colony. Mr. Mackelvie could hardly have forwarded a more useful addition, or one more likely to prove permanently valuable.

CONCLUSION.—In conclusion the Council have to tender the thanks of the Institute to the numerous donors to the Museum and Library not mentioned in the body of the report. They also wish to draw attention to the continued kind services of Messrs. W. K. Graham and Co and Mr. Hugh Craig, as agents of the Institute in London and San Francisco respectively. Thanks are also due, as in many previous years, to the Pacific Mail Steamship Company, the New Zealand Shipping Company, Messrs. Shaw, Saville and Co., and other firms and establishments, for kindly carrying free all packages intended for the Museum.

The Treasurer in Account with the Auckland Institute.
